Steven Koike is plant pathologist with and director of TriCal Diagnostics. He oversees operations for this commercial diagnostic lab, leads the team in providing expert plant disease diagnostics and problem solving, conducts soil testing for pathogens, researches soilborne and foliar pathogens, and provides plant pathology and IPM information to those who grow and work with agricultural commodities throughout the U.S.

Prior to TriCal Diagnostics, Koike was extension plant pathologist with the University of California Cooperative Extension and conducted research and extension activities in California's central coast region. With the university, he designed and operated the only off-campus diagnostic lab and investigated diseases of vegetable, fruit, and ornamental crops. During his 28-year extension career he published over 1,000 scientific and extension publications, including his 450-page book *Vegetable Diseases: A Color Handbook*. He presented his research at many national and international conferences, gave 374 extension talks, and organized and hosted 88 extension meetings and workshops.

Koike has received numerous awards, including the national Excellence in Extension Plant Pathology award from the American Phytopathological Society and the Outstanding Contribution to Agriculture Award from the California Association of Pest Control Advisors.

Recent Peer-Reviewed Scientific Publications

Choudhury, R. A., Koike, S. T., Fox, A. D., Ancheta, A., Subbarao, K. V., Klosterman, S. J., and McRoberts, N. 2016. Season-long dynamics of spinach downy mildew determined by spore trapping and disease incidence. *Phytopathology* 106:1311-1318.

Kunjeti, S. G., Ancheta, A., Martin, F. N., Choi, Y.-J., Thines, M., Michelmore, R. W., Koike, S. T., Tsuchida, C., Mahaffee, W., Subbarao, K. V., and Klosterman, S. J. 2016. Detection and quantification of *Bremia lactucae* by spore trapping and quantitative PCR. *Phytopathology* 106:1426-1437.

Koike, S. T., Stanghellini, H., Mauzey, S. J., Burkhardt, A., and Stanghellini, M. S. 2019. First report of Phytophthora root and bulb rot caused by *Phytophthora cryptogea* on shallot in the United States. Plant Disease 103:1436.

Koike, S. T., Stanghellini, H., Mauzey, S. J., and Burkhardt, A. 2019. First report of Sclerotinia crown rot caused by *Sclerotinia minor* on hemp. Plant Disease 103:1771.

Moyne, A.-l., Blessington, T., Williams, T. R., Koike, S. T., Cahn, M. D., Marco, M. L., and Harris, L. J. 2019. Conditions at the time of inoculation influence survival of attenuated *Escherichia coli* O157:H7 on field-inoculated lettuce. Food Microbiology 85: (<https://doi.org/10.1016/j.fm.2019.103274>).

Awards

1999 Resolution for excellence in service and research. Monterey County Board of Supervisors.

2000 Award for Outstanding Achievement in Extension. California Friends of Agricultural Extension.

2005 Award from the Joseph M. Ogawa Research & Teaching Endowment. UC Davis.

1993, 1998, and 2006 Milton D. & Mary M. Miller Plant Science awards. UC Davis.

2011 Oscar Lorenz Award for meritorious service to the California vegetable industry. UC Davis.

2002 and 2011 Distinguished Service awards for Outstanding Research. University of California.

2013 National Excellence in Extension Award. American Phytopathological Society.

2018 Outstanding Contribution to Agriculture. California Association of Pest Control Advisors.
