

Special Projects, Research, and Investigations

TriCal Diagnostics is available to assist with specialized plant pathology projects:

- Field problem solving investigations
- Fungicides and biologicals efficacy testing (lab, greenhouse, field)
- Production of pathogen inoculum for research
- Collaborations on projects and grants
- Consultations
- Expert witness information

Special Projects, Inoculum Production, Research Collaborations

Contact Steve Koike to discuss special projects and other available plant pathology services.

Problem-Solving Field Investigations

Steve Koike is available for on-site field and greenhouse consultations. Contact Steve for details. The field consultation fee is \$150 per hour, including direct travel time to the site (but not including travel breaks/stops).

Any samples collected will be analyzed by the TriCal Diagnostics lab and charged separately according to the standard fee schedule.
