

Research Program

TriCal Diagnostics is available to assist with specialized plant pathology projects:

- Fungicides and biologicals efficacy testing (lab, greenhouse)
- Production of pathogen inoculum for research (*clients must have proper permits*)
- Collaborations on projects and grants
- Other research services

Research Collaborations

Unless otherwise stipulated (such as via a line-item budget with a grant proposal), TriCal Diagnostics charges a \$210 per hour rate for research. This covers preparation and research time for the project for Dr. Hanane Stanghellini and TCD lab personnel.

Specialized supplies and equipment are not included in this hourly rate.
